

↓ Mini greenhouse

As the weather cools, a greenhouse is the perfect environment for your plants, but it's often difficult to fit one into a home garden. The compact Maze Lean-to Greenhouse (*below*) is a good solution. Made with almost unbreakable polycarbonate panels, a rust-resistant aluminium frame and UV protection, it withstands all weather conditions well. Another feature is a vent window, which can be opened to balance humidity and temperature. The greenhouse comes with simple instructions so assembly is easy. It's great for most small gardens and, at \$379, is a worthwhile investment. For stockists, call 1300 449 107 or visit mazeproducts.com.au
