

Repurposing Art

PLASTIC BOTTLE CAP MOSAIC

Purpose:

Recycling teaches children to care about the environment and understand that resources are not limitless. Making art is a fun way to explore this concept

Tools:

canvas, caps, plastic glue,
course sandpaper

Method:

Sand the top of the lids and rough them up to help the caps stick to the canvas.

Use a generous portion of the glue so it oozes out the sides.

Start gluing at the center and work your way out. Let it dry flat for a few days;

Once it is dried you will have a colourful, textured piece of up cycled wall art that you can hang
