

# WHICH RUBBISH GOES IN WHICH BIN THINK BEFORE YOU THROW

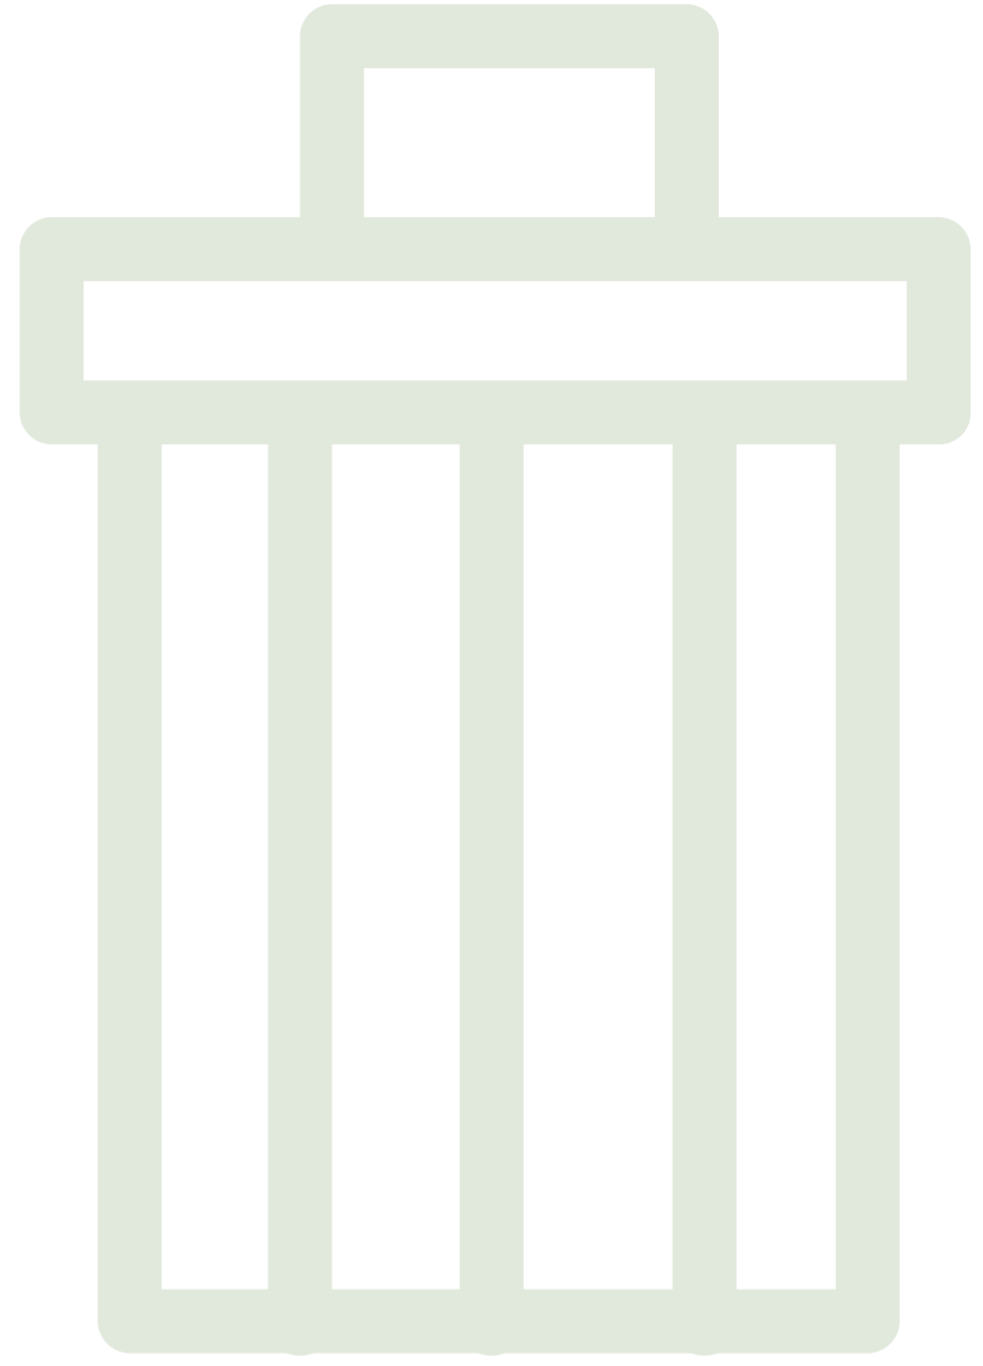

## RUBBISH

Our aim and responsibility is to reduce this section to have a positive impact on decreasing landfill

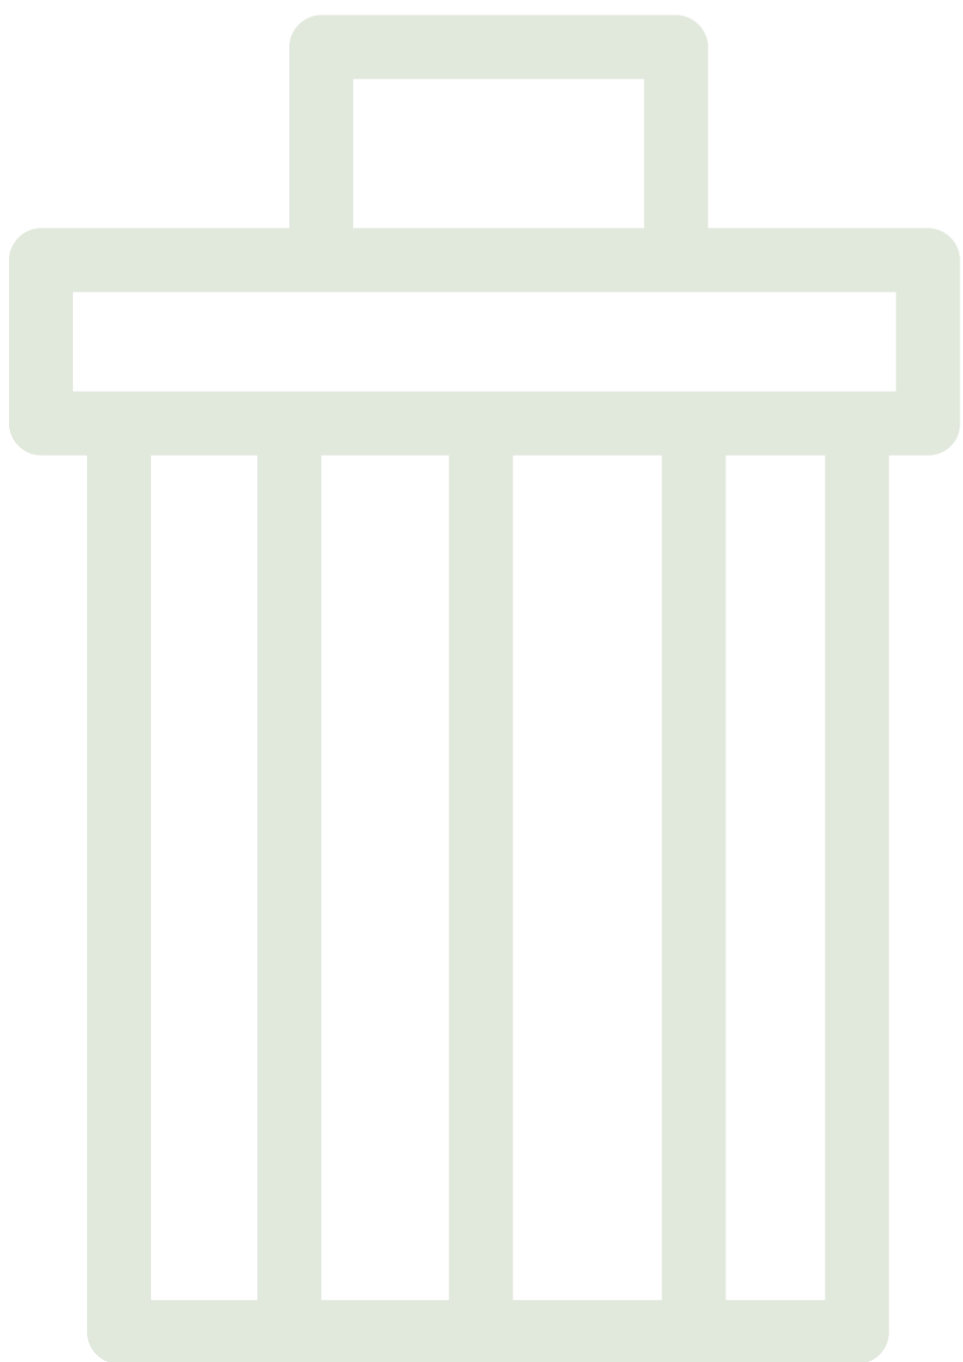

## RECYCLE

Nearly 80% of everyday rubbish can be recycled. Recycled materials such as plastic are turned into things we can use again and again

## REUSE

Many household items can be reused instead of thrown into the bin

## COMPOST

About 25% of what is thrown into the bin can be composted. When composted material is added to a garden it provides important nutrients that help plants grow
